

Lifetime Anti-Shock Limited Warranty

The manufacturer warrants that this carpet will not generate static electricity in excess of 3 kilovolts (tested according to AATCC 134) during the useful life of the carpet, provided that the carpet is properly installed and maintained indoors according to the manufacturer's maintenance and installation recommendations (see general warranty details below).

If after testing of the carpet according to AATCC 134, the manufacturer determines that the carpet has generated in excess of 3 kilovolts, and that all warranty conditions have been met, the manufacturer will compensate the owner on a pro rata basis for: (1) the original material cost of the carpet for the area directly affected, and (2) a reasonable installation allowance.

General Warranty Details

- **Warranty Coverage**

The manufacturer will repair or replace the portion of the carpet that does not perform according to our warranties. If all warranty conditions have been met, the manufacturer will compensate the owner pro rata for the original cost of the carpet for the directly affected area and a reasonable installation allowance. Reasonable re-installation costs are limited to \$5 per square yard or \$100 when the area is less than 20 square yards. Any charges for carpet disposal, new padding or moving furniture, equipment, etc. are the responsibility of the owner.

- **Installation**

The carpet must be installed in accordance with the Carpet & Rug Institute Carpet Installation Standard 2009. Seam sealing is mandatory on all installations. Power stretching is mandatory on all stretch-in installations.

Maintenance

The carpet must be maintained and cleaned in accordance with the manufacturer's recommendations as outlined in "Commercial Maintenance Guidelines for Commercial Applications" by The Carpet and Rug Institute. Daily spot cleaning and vacuuming of traffic areas, weekly vacuuming of all areas and periodic steam cleaning are all an integral part of any pre-planned routine and ongoing commercial maintenance program. Do not over-wet the carpet when cleaning. Allow carpet to dry thoroughly before exposing to traffic. When cleaning spots never pour solvents directly on the carpet, apply to a cloth and blot carefully.
